

3. Crazy Eights (Individually)

Design the interface for 3 of the features you were assigned using the [crazy Eights approach](#)

([Links to an external site.](#))

. Ensure that at least two members sketch the same feature interface.

4. Solution sketch (Individually)

Create a 3 panel story board for you idea. The first panel should have a brief description of the feature. The second and largest panel should be a sketch of the interface that achieves the goal of the feature. The final panel should have notes about the sketch. When you are finished, have a team member create a "Design Sprint day 2 " folder in your Github project. Upload your work from this submission so that it can be shared with the team.
