

International Wealth Visualizer- Storyboard

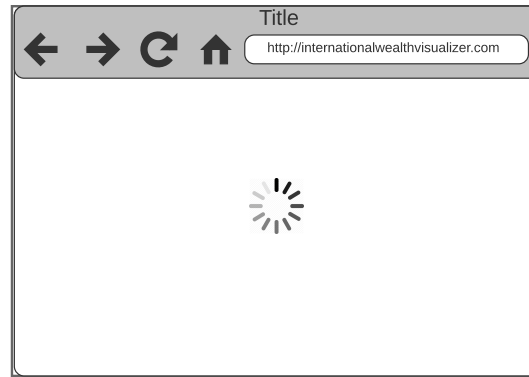

Niara Parker | November 30, 2020

Persona: Economics Student

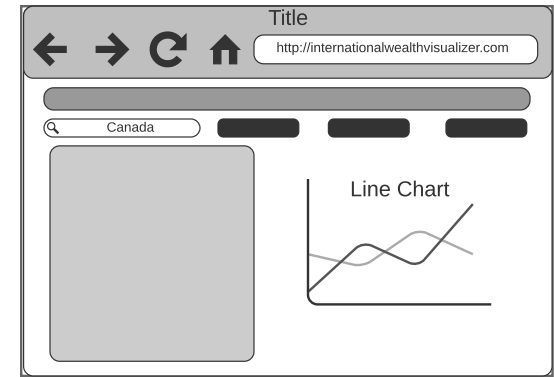

Scenario: Calculating GDP of specific countries

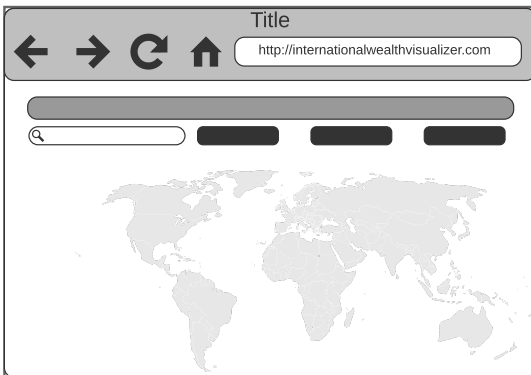

- A student searches the web to look up the GDP of specific countries for an assignment they are working on

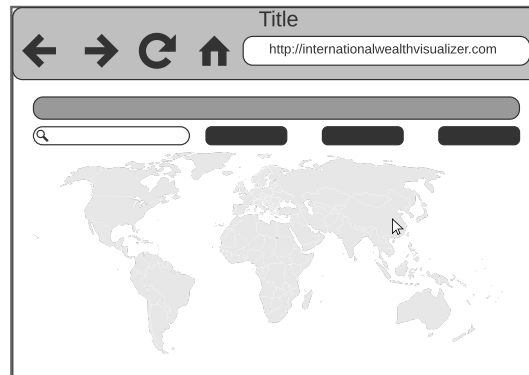

- Students sees "International Wealth Visualizer" and decides to click on it

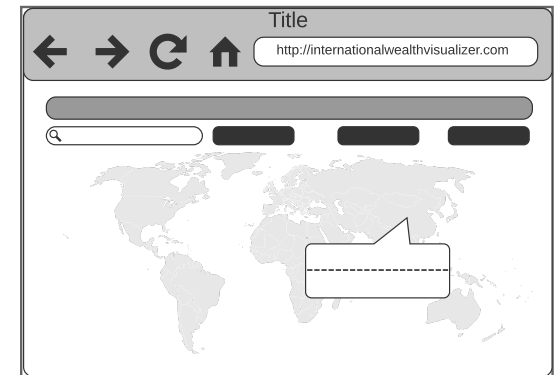

- Student explores website and goes to search bar and types "Canada"

- Student is able to gather info they need regarding Canada and decides to explore more and discovers interactive map

- Students hovers over map and clicks on China to see what happens

- Student discovers that it provides data based on country they click on and is able to gather the data they need
